```tsx
import React, { useLayoutEffect } from "react";
import { StyleSheet } from "react-native";
import { useNavigation } from "@react-navigation/native";
import { Portal } from "@gorhom/portal";
import AnimatedFAB from "../Components/AnimatedFAB";
import Container from "../Components/Container";

const FABGestureScreen: React.FC<any> = () => {
   const navigation = useNavigation();

   useLayoutEffect(() => {
      navigation.setOptions({ title: "FAB Gesture" });
   }, [navigation]);

   return (
      <Container padding={15}>
         <Portal name="modal">
            <AnimatedFAB />
         </Portal>
      </Container>
   );
};

const styles = StyleSheet.create({});
export default FABGestureScreen;
```
